Summary

Full-Stack Software Engineer with 3+ years of experience building scalable web and mobile applications using TypeScript, Vue.js, React, React Native, and NestJS. Delivered production systems serving 10,000+ users, published mobile applications to the Apple App Store and Google Play Store, and improved deployment efficiency with Docker. Passionate about building reliable software and solving complex engineering problems in Agile teams.

Technical Skills

Languages: TypeScript, JavaScript, PHP, SQL

Frameworks: Vue.js, React, React Native, Next.js, NestJS

Databases: PostgreSQL, MongoDB, MySQL, Prisma, Supabase

DevOps & Cloud: Docker, GitLab CI/CD, AWS Lambda, Cloudflare

Tools: Git, Figma

PROFESSIONAL EXPERIENCE

Full-Stack Engineer July 2022 – Present
Tekab Dev *Tunisia*

- Developed and maintained enterprise web applications using Vue.js and NestJS, contributing to a platform serving 10,000+ users.
- Developed RESTful APIs, authentication systems, and backend integrations for enterprise applications.
- Built and deployed two cross-platform React Native applications to both the Apple App Store and Google Play Store.
- Translated Figma designs into responsive cross-platform interfaces, improving UI consistency.
- Built reusable SurveyJS components with conditional logic, validation, multilingual support, and dynamic workflows.
- Containerized development environments using Docker, reducing deployment time by approximately 20%
- Collaborated within Agile teams through sprint planning, code reviews, and daily stand-ups to deliver production features.

Freelance Full-Stack Developer 2021 – 2022

- Designed and developed custom web applications using the MERN stack.
- Led the complete software development lifecycle for freelance projects, from client requirements and architecture design to deployment and post-launch support.
- Implemented responsive React interfaces and secure JWT authentication, improving application security and user experience across client projects.
- Managed the end-to-end delivery of freelance projects, coordinating planning, development, testing, deployment, and client handover to ensure on-time delivery.

PROJECTS

Msafer — Collaborative Delivery Mobile Application
WeOps *Paris, France*

- Developed production-ready Flutter interfaces from Figma designs for Android and iOS, contributing to an application with 5,000+ Google Play downloads.
- Automated user provisioning using AWS Lambda, eliminating manual onboarding processes.
- Integrated Firebase backend services and authentication.

Education

Polytechnique IPSAS 2022 – 2025
Computer Engineering *Sfax, Tunisia*
ISIMA 2019 – 2021
Bachelor's Degree in Computer Science *Mahdia, Tunisia*
